[Characteristic]

●Kyushu Red Pepper Ekito, which has been lovingly raised by growers throughout Kyushu, is processed into "thread trimming" that is unique in Japan. The manufacturer is dried them at a factory in Kumamoto- Prefecture and consistently perform sorting, processing, and commercialization.

●It is characterized by its low spiciness, which not only adds color to the dish, but also does not spoil the taste of the dish itself, so it can be used for both Japanese and Western dishes. You can enjoy the deliciousness that is different from the reddish coloring such as paprika and tomato. You can easily use it when you would to add color as a topping for salads, fish dishes, vegetables, and any dishes. First, please try a small amount.

[Notice]

- Please consume immediately after opening.
- Please be careful for small children, elderly people, and people who are not good at spicy foods.

[Back Labels of our Products]

- The back of this product is written in Japanese only. If you need labels in each languages, please contact us.
