Not only Saw Palmetto and Cucurbita pepo, but also Yakushima's native species "Peucedanum Japonicum"

Our "Peucedanum Japonicum " is for unisex product and which has excellent compliance with one capsule prescription once a day.

● What is the Peucedanum Japonicum

Scientific name: Peucedanum Japonicum that is a multi-year-old Umbelliferae that grows mainly from southern Kyushu along the coast of Okinawa. In Okinawa, it is also called longevity grass or sakuna and is eaten as a healthy vegetable.

● What is the isosamidin?

We conducted a functional study of Peucedanum Japonicum, a species native to Yakushima, Kagoshima-pre and clarified that a component called "isosamidin" has a useful function. Isosamidine is a component contained in Peucedanum Japonicum which a rare species native to Yakushima that is cultivated without the use of chemical pesticides. □ * The future of farmers opened up by Peucedanum Japonicum (YouTube) <https://www.youtube.com/watch?v=-y3CijKhULw> □

● Regarding to the Frequent Urination Function

Most of men have residual urine, frequent urine, Urine disruption, Urinary urgency, Weak urinary, and nocturia, which are mainly affected by benign prostatic hyperplasia then, Women are prone to urinary incontinence, or stress incontinence, caused by coughing, sneezing, and laughing. □

"Overactive bladder" such as urinary urgency, pollakiuria, and urge incontinence is common in both men and women. □

● We would support your requested products.

We select plant-based soft capsules based on the idea of standardized raw materials and plant-based foods, which have a higher concentration than the previous clinical trials, and cultural customs.

Until now, it was divided into men's and women's products, but it can be developed as a unisex product that you can experience with one tablet once a day. We can also develop original prescriptions for men and women, as well as for synergistic effects. Please feel free to contact us.
